The Social Workers' Toolbox

Sustainable Multimethod Social Work

Herman de Mönnink, Retired Senior Lecturer, Hanze University, The Netherlands'

This book aims to bring order to the diversity of methods which is so typical of social work. The tools described can be directly put into practice and adapted to the social worker's personalised approach with their clients. Useful for both the inexperienced and the more practiced social worker, the book provides a solid basis through the use of numerous practical examples and offers the more experienced social worker a substantial resource and the means to legitimise a chosen course of action and social work intervention. Schools of social work will be able to use the book as an easily accessible resource for social work assessments, interventions and quality social work management.
